

SharePoint Accelerator

*A quick-start, low-cost solution that leverages
market-leading software and deployment best practices*

Anyone can have a SharePoint portal, but why do companies choose PPC as their integration partner?

SharePoint Accelerator

It's important that the portal system you adopt is designed to respond to your organization's current and long term business needs, and that it is easy to use. With over 200 portal deployments in the public and private sectors, Project Performance Corporation (PPC) has the experts and the experience to ensure that your SharePoint deployment is seamless and that it is tailored to meet the specific needs of your business.

45 Days...

In just 45 days, your company will realize the benefits of the SharePoint Accelerator:

- Secure collaboration and document sharing
- Electronically maintain document version history in one place
- Retain knowledge with a central document repository
- Eliminate need for email document attachments
- Reduce duplication of work
- Easily retrieve information prepared for that meeting or event

PPC's SharePoint Accelerator uses Microsoft Office SharePoint Server (MOSS) 2010, a proven web collaboration resource that has improved productivity in countless organizations. A scalable and light-weight portal solution, it fits in seamlessly with a Microsoft network and the Microsoft office suite. Many organizations are choosing MOSS 2010 as a solution to provide secure web collaboration between offices and project teams. With SharePoint's built in search, knowledge can be searchable and re-usable.

PPC Advantage

- Access to best practices and case studies from our 200+ portal deployments
- Use of our templates to customize your solution
- Seasoned consultants who transfer knowledge, ensuring a sustained return on investment
- A flexible delivery model founded on shared goals
- Adaptable approaches and proven methodologies tailored to your requirements
- Tight-knit teams with advanced technical skills and certifications
- Practices that emphasize risk minimization; agile, on-time, and within-budget performance

The PPC Four-Part Solution

Over our 200 portal deployments, PPC has perfected the 45-day, four-part SharePoint Accelerator solution that covers the end-to-end implementation of SharePoint. The SharePoint Accelerator will examine every area of your business and design a web-based collaboration solution that will meet your current needs, as well as your long-term objectives.

Part One	Part Two	Part Three	Part Four
2 Weeks Navigation, Search, Document Management	1 Week SiteLayout, Usability	4 Weeks Installation, Configuration	2 Weeks Training

In addition to full deployment of a customized SharePoint portal, you will also receive the benefit of PPC's experience with MOSS 2010 and related knowledge management best practices, including:

- Expert enterprise information architecture and data governance integrated with the enterprise portal solution
- Usability design to ensure user satisfaction and loyalty
- Web content management implementation and content management strategy
